Hi, I'm Daniella 👋🏾

Entrepreneur | Developer in Progress | Cybersecurity Student

I'm a licensed business owner and developer building at the intersection of technology, security, and entrepreneurship. With over 9 years running my own business which includes lash extensions, ombré powder brows and background as a licensed massage therapist specializing in post-operative care, I've built my career around precision, trust, and protecting people.

Now I'm channeling that same energy into tech.

🛠️ Technologies & Tools
